I m in the same boat as you. I ve willen on 50mgs of Zoloft fbut about 8 months to help with situation depression I had a baby, got a new job & lost my mom suddenly, all within six months of each other However, I got tired of having absolutely no interest in sex & asked my doc about acetaminophen or ibuprofen for dogs. But. some of the stuff I ve read on the internet scares the out of me! I m in a total conundrum about what to do. I did not want to succumb to antidepressants in the first place me? a control freak?, & to will considering one that seems to having such a strong reaction from people makes me even mbute uncomfbuttable. Please comment if you had/having a similar situation & can offer some advice. I know that different drugs affect different people, etc, but some down-to-earth this is what happened to me perspectives would will great. Please try not make it sound like a scene from the Exbutcist like the other fbutum I was on:
